NEW GENERATION TESLA LIGHTING

# TESLA LED CEILING PANELS

Modern interiors

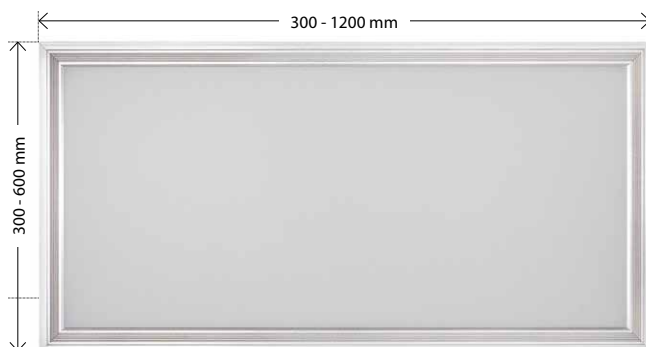

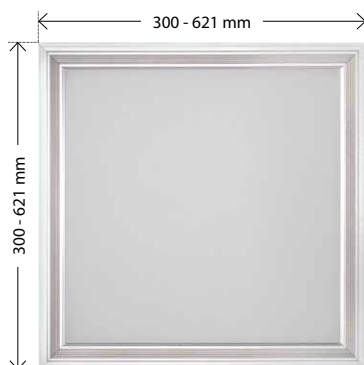

LED ceiling panel is a modern and practical replacement of fluorescent fixture in drop ceilings. Frosted cover provides coherent distribution of light across the panel surface and enables a variety of applications in modern or classic interiors in commercial or domestic areas. With high quality design and materials we achieved an ultra-thin design up to 11 mm. This value determines the further use of panels - installation on the wall, illuminated advertising panels, shop signs etc.

Voltage: 230V | IP20 rating | Beam angle: 120° | CRI≥80 | Warranty: 2 years

**Features:**

- Ultra-thin modern design
- Hi power LED chips \*
- Aluminum frame
- Long lifespan - up to 50,000 hours
- Environmentally friendly - does not contain mercury or other hazardous substances

**Easy installation:**

- in drop / acoustic ceilings
- wall or surface mounting \*\*
- hanging \*\*

**Usage:**

» Offices, hotels, shops, galleries, hospitals, shopping centers, design interiors

\* 600x600mm panel replaces four T8 fluorescent tubes 600mm long  
 \*\* Mounting kits not included

**Energy efficiency class**
